MARQUEAS STUDIES INSTITUTE
<http://www.SpiritOne.com/~msi/>

The basic aim of MSI is to promote research in the Marquesas in all disciplines. Founder of MSI, David Addison, is also putting together a multi-disciplinary study of the leeward side of Nuku Hiva. Future plans involve a small journal and online research resources. Check out their web site.
INTERNATIONAL STRING FIGURE ASSOCIATION

On Easter Island string figures are known as kaikoi. Each year during the Tapati festival participants in the kaikai contest attempt to weave the island's traditional designs and recite the ancient chants that accompany them, all with great style and charm.

The International String Figure Association was founded in 1978 to gather and preserve string figures from around the world. Members receive our annual Bulletin (200-page book), quarterly magazine, and semi-annual newsletter.

CONAF REQUEST

Assistance is being requested by CONAF (National Parks of Chile, Easter Island). A Park project is underway to provide toilet facilities at certain heavily-visited sites around the island for the accommodation of tourists. The units are called Recycling Self-Contained Composting Toilets and are manufactured in Chile under US license. Each one has a solar panel for a ventilation fan and each toilet costs US$5000. If anyone wishes to contribute to this project, the Park has a special arrangement with a CONAF foundation to receive donations so that they go directly into the island project. Contact us at Rapa Nui Journal for further information.

Anyone who has searched in vain for a friendly tree on Easter Island will identify with this project! Tourists are aghast to find, while on tour, that except for Anakena there are no sanitary facilities outside the village. And those at Anakena are often unfit for use.
