The island of Gotland is the largest island in the Baltic Sea, lying 100 km off the eastern coast of Sweden. Although settled during the Stone Age, today it is best known as the “Viking Island.” Gotland’s main city, Visby, is ringed by ancient stone walls and towers and was a busy trading center of the Hanseatic League. Its 13th century ramparts make it the best fortified commercial city in northern Europe. Visby was declared a UNESCO World Heritage City in 1995.

Gotland’s archaeological sites range from the Bronze, Iron and Stone Ages, monastary ruins from the Middle Ages, and Medieval churches. It has the world’s largest treasury of silver hoard, dating from the Viking Age. The silver hoard is on display at Visby’s Historical Museum.

Today Visby is known for its excellent shopping, seven golf courses, charming gabled houses, and archaeological ruins. The island’s extensive beaches attract visitors; Gotland has more hours of sunshine than anywhere else in the country.

The island is reached via air, or by bus/ferry from Stockholm, via Nynashamn.
